C-COR:
Meeting the demands of an on demand world.™

C-COR offers world-class, market-focused business solutions for cable operators, telephone companies, broadcasters, and other private and public sector entities. Our solutions simplify the transition to IP demand-oriented broadband networks by delivering interoperable, modular products in sync with IP network upgrade cycles. C-COR's core set of access and transport technology, software applications, and a corps of expert field engineers are organized under three synergistic business units — C-COR Access and Transport, C-COR Solutions, and C-COR Network Services — all with one mission: to be a trusted partner in helping our customers put their subscribers in personal control of their entertainment, information, and communications needs.

C-COR provides technologies and solutions that enable business service delivery; digital program/ad insertion; content management and delivery of VOD, VoIP, and HSD; network capacity expansion; centralized office automation for workforce management, network assurance, and subscriber fulfillment; and a variety of outsourced field services that keep networks operating at peak performance. Equally important, C-COR has the understanding and brain trust to help meet the needs of broadband networks of any size, at any stage of development, in just about any part of the world.

With decades of proven success, years of industry innovation and continual enhancement and expansion of products and services, today's C-COR offers a comprehensive set of innovative products and solutions enabling network operators to simplify their transition to the on demand IP era.

F or more than 50 years, C-COR has been providing products and services needed to successfully build, maintain, and transition the most advanced multi-service communications networks in the world. Today's C-COR combines decades of innovation with the talents and technologies of a vital group of leading companies to create a powerhouse of advanced products, services, and solutions to confidently help broadband operators meet the demands of an on demand world.

Our years of continued advancement and success have created a distinct set of advantages for C-COR customers. Most notable is an unsurpassed level of business experience and technological expertise that comes from years of working with network operators. Our longevity is also a clear indication of how solidly C-COR products have continually performed in the global marketplace as well as evolved to meet the ever-changing infrastructure and operations environments of the communications industry. All of this speaks directly to C-COR's ability to offer today a comprehensive set of modular and interoperable products, solutions, and services that enable network operators to simplify their transition to the on demand IP (Internet Protocol) era.
